

**AllerAir™**  
INDUSTRIES INC.

## *The 6000 Exec air purifier*

### *Large scale gas and odor abatement*

*22 to 36 lbs. of activated carbon filtration  
to deal with large scale gas and odor problems.*

*Any HEPA air cleaner will trap solids but what about **gases and odors**?  
You need **carbon** for that. Not just a few ounces but pounds of it!*

*Only...  
The **AllerAir™** Mass Activated Carbon Bed MAC-B filtering system  
can eliminate noxious gases and odors from the air you breathe.*

### *The AllerAir 6000Exec features*

- Cleanable pre-filter to collect larger particles.
- 22 to 36 lbs. mass activated carbon bed MAC-B filter that adsorbs noxious gases and odors.
- HEPA filter to trap 99.97% of solid particles as small as 0.3 microns.
- 2 anti-microbial filters.
- All metal construction to avoid plastic vapors.
- 400 CFM 3 speed fan.
- Cylindrical shape to maximize air flow.

### *An excellent choice*

*For large homes, basements, big lofts,  
offices, commerces, mid-sized warehouses,  
and light industry.*

- Effective up to 1800 sq. ft.
- Changes the air every 30 minutes.
- Excellent for a central air system.
- Positive and negative air attachments available.
- Vocab and UV versions available.
- 5 year guarantee. (extendible to 10 years)

*The 6000 Exec  
18 to 35 lbs. of activated carbon,  
combined with true HEPA*

*Protect yourself from noxious gases and odors as well as particles  
with the **AllerAir** 6000 Exec*

# AllerAir™ 6000 air cleaner

## Large scale gas and odor abatement

*Our bodies do have some defenses against particles but none against gases and odors.*

*Most domestic air cleaners on the market only really protect against particles. They only have a few grams of carbon sprayed on a mesh for gases and odors. It's not enough.*

*Activated charcoal is the filter material used in military gas masks.*

*AllerAir air cleaners are used in hospitals, dental clinics, laser eye surgeries.*

*Invest in a real air cleaner: preserve your health and save on expensive medicines.*

*Chemicals have replaced bacteria and viruses as the main threat to human health in western industrial nations.*

*Rick Irvin Professor of toxicology at Texas A and M University.*

### **22 to 36 lb. MAC-B carbon filter bed**

- *Mass Activated Carbon can trap 60% of its own weight of noxious gases and odors.*
- *The more carbon you have the more pollutants will be trapped.*
- *The AllerAir 6000 Exec is designed for large scale gas and odor abatement*
- *Its MAC-B carbon filter can be ordered with 22 to 36 lbs of activated carbon*

### **HEPA filter**

- *Traps airborne particles such as dust mites, pollen, mold spores and animal dander.*
- *A HEPA filter can trap 99.97% of particles as small as 0.3 microns. That's the size of some bacteria.*

### **A cleanable pre-filter**

- *Stops larger material such as lint or paper from reaching the particle and gas and odor filters.*

### **2 anti-microbial filters**

- *Inhibit the growth of bacteria and viruses.*

### **Metal housing with baked enamel finish**

- *Plastic casing air cleaners can be cheaper, but plastic gives off vapors back into the indoor air.*

### **Cylindrical shape maximizes air flow**

- *The air flows in from the bottom through the 4 filters and circulates out through the top of the unit in the chosen direction.*
- *The outflow of clean air is separated from the inflow by the height of the cleaner. This avoids any mixing.*

### **Effective up to 1800 square feet**

- *Large enough to clean the air in a large living area or workspace.*
- *Three speed motor for rapid area cleaning or quiet overnight use.*

***A powerful air cleaning system that removes noxious gases and odors as well as particles from the air you breathe***
